

To whom it may concern:

Absolutely Not! No!

I do not agree with bringing in 10-1000's of defenseless rabbits for any type of farming that does not constitute as usage for rescuing/sanctuary.

I say No to factory farming. I say No to butchering. I say No to housing for either of them.

Rabbits have been upgraded from livestock to exotic/domestic companions and do not belong on our dinner plates nor do they belong in a holding facility being shredded apart. Rabbits also require a life saving vaccine (RVHD) which is on back order and will only cause more complications to wildlife, responsible companion owners when a lot sized infectious disease runs rampant causing health issues in CT. This is a BIG NO!
